### METRO Collection by CLEAF

CLEAF was founded in the 1970s, attempting to market composite panels to order. Today, almost 40 years later, they have managed to achieve control of an entire manufacturing chain of custom made panels for the furniture and interior design industry internationally.

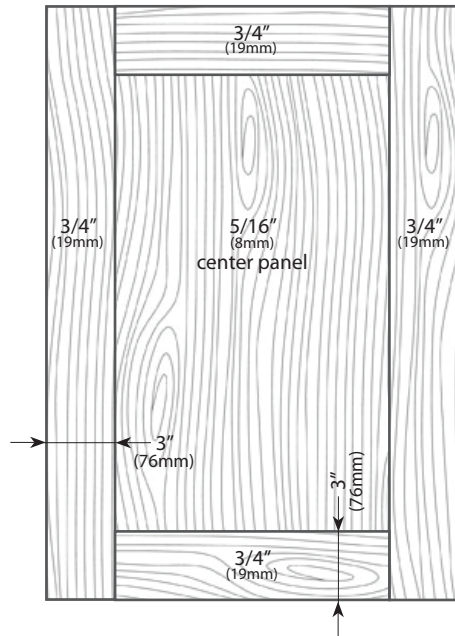

CLEAF's identity and culture are deeply rooted in the historical furniture district of Brianza, a region and network of Italian companies engaged in an ongoing and reciprocal collaboration. This privileged geographic position enables CLEAF to take advantage of huge synergies including the exchange of skills and the achievement of economies of scale.

CLEAF Thermo Structured Surface boards are made from unique decorative papers that are treated with melamine resins that under heat and pressure become part of the panel itself hence the term Thermo Structured Surface (TSS). The application of an irreversible thermal hardening treatment and the special preparation and processing, allow remarkable 3dimensional effects, bringing the surface to life and endowing it with extraordinary technical performance.

The **METRO Collection** is a group of twenty-six select CLEAF Thermo Structured Surface Carb 2 compliant boards that replicate both the look and feel of natural wood grain. The patterns and textures of the **METRO Collection** by CLEAF offer an impressive range of options for creating stunning custom interior spaces.
